

A Club Worth Smiling About!

Dear Valued Colleague:

Super smiles start young! As you know, it's never too early to start kids on the way to a future full of smiles! It's in that spirit that we invite you to partner with us in promoting our **Kids Club and Pre-Orthodontic Guidance Programs** among your staff and patients. These programs are designed to begin a special observation process for our patients beginning as early as **seven years of age** and get them excited about healthy smiles. The benefits of pre-orthodontic guidance enables us to monitor a child's development with periodic **six-month examinations at no charge**, and allow us to intercept any abnormalities at an early age that will minimize extensive and lengthy treatment later.

And now, to give our young patients an active role in their smile development, we are pleased to offer our new "**Little Dragon's Kids Club**," designed especially for our awesome young patients! So how does it work?

Our observation patients each receive a cool membership card that they are instructed to bring with them to each appointment. For every visit they show us their membership card, young patients have the opportunity to win great rewards like movie passes or gift cards to their favorite places, and are also entered in our drawings, happening every six months, to win an **iPod, Wii, Nintendo DSi-3D, flat screen tv, or boys and girls bicycles!**

Membership expires once our observation patients get their braces, so refer them now and let them enjoy the perks while they last! Of course, braces on or off, we still think the patients you refer are awesome!

If you have any questions about our Pre-Orthodontic Guidance Program or **Little Dragon's Kids Club**, please do not hesitate to call us at 325-695-2040. Thanks in advance for sending us your observation-age patients (age seven and up) and helping us start them on their way to healthier, happier smiles. We appreciate your partnership and are thrilled to work with you in creating smiles that truly last!

Sincerely,

Dr. Lee & Team
